Education

Arizona State University

Master of Computer Science

May 2026 – Present

Motilal Nehru National Institute of Technology

Master of Technology in Computer Science · GPA: 3.7 / 4

Jul. 2017 – Jun. 2019

University of Allahabad

Bachelor of Technology in Computer Science · GPA: 3.2 / 4

Jul. 2013 – Jun. 2017

Experience

Freelance Web Developer

2024 – 2026

Independent · Remote

- Designed and delivered custom e-commerce websites for local and offline businesses, partnering with another developer end-to-end on scope, build, and launch.
- Built responsive UIs, product-catalog management, and customer-facing checkout flows using **HTML**, **CSS**, **JavaScript**, and modern web tooling.
- Worked directly with clients to gather requirements, scope features, and ship production-ready solutions.

SLB (Schlumberger)

Jan. 2020 – Nov. 2022

Software Development Engineer

- Designed and implemented an internal file-sync infrastructure with **Golang**, **Google Pub/Sub**, and **Bash**, improving company-wide file-management capabilities.
- Led a VM-deletion initiative across **Azure** and **Google Cloud** using Azure DevOps pipelines, delivering **~50% cost savings**.
- Built automated testing and deployment pipelines on Azure DevOps for image testing and release.
- Streamlined API development by transitioning to Axios and implementing correlation-ID logging plus Postman-based functional testing.
- Implemented a **Redis**-backed caching mechanism for auth tokens across internal microservices.

SMS Magic (Mobile Media Pvt. Ltd.)

Jul. 2019 – Jan. 2020

Full-Stack Software Developer

- Designed and shipped new billing features for the messaging platform, including per-message, monthly, and annual subscription plans.
- Built a customer-facing dashboard for end users to view messaging data, with dynamic charts via **chart.js**.
- Implemented and maintained RESTful APIs for the messaging system in **Java**; integrated with Salesforce objects using **Apex** and **SOQL**.
- Set up an automatic deployment pipeline with **Jenkins**.

Nvidia

Aug. 2018 – Mar. 2019

Software GPU Engineer Intern

- Worked on **NVAPI SDK** support for Linux in the NVAPI team using **C++**.
- Developed a testing tool that automated testing for **150+ APIs with 100% test coverage**.
- Tested and debugged features across multiple GPU generations using internal tools and **GDB**.

Projects

Reservoir Sampling Visualizer | React, TypeScript, Node.js, Socket.IO

[GitHub](#) · [Demo](#)

- Full-stack web app that visualizes the Reservoir Sampling algorithm on streaming data; backend streams CSV files line-by-line through a simulation engine and pushes every accept / replace / reject decision to the React UI over WebSockets.
- Memory footprint stays at **O(K)** regardless of input size; deployed on Render with a TypeScript / Express service.

MCP Server | TypeScript, Node.js, Model Context Protocol

[GitHub](#)

- Built an exploratory MCP (Model Context Protocol) server that integrates custom tools with LLM clients. A hands-on dive into the MCP spec, transport layer, and tool-invocation lifecycle.

Web GIS for Primary School Education | PostGIS, PostgreSQL, JavaScript

[GitHub](#)

- Built a Web GIS application comparing primary-school education facilities across a state. Collected and plotted GIS data via Web GIS technology.
- Deployed backend and frontend on a Tomcat server with a PostGIS-backed spatial data store.

Skills

Languages: C++, Java, Go, TypeScript, JavaScript, Python, SQL, HTML/CSS, Bash, PowerShell

Backend & Frameworks: Node.js, Express, REST APIs, Salesforce Apex, React, React Native

Cloud & DevOps: Google Cloud Platform, Azure, Docker, Kubernetes, Jenkins, Azure DevOps, CI/CD

Data & Tools: PostgreSQL, MySQL, Redis, Kafka, Google Pub/Sub, Postman, Swagger, Git/GitHub, Linux

Currently Exploring: Machine Learning Systems, Distributed Systems, System Design, Backend Engineering
